

ROLLWAY®

ROLLER BEARINGS FOR METAL INDUSTRY

 **RegalRexnord™**

ANTI-FRICTION BEARINGS

Since the introduction of anti-friction bearings into rolling mills in the 1920's, Rollway® bearings have been a high quality engineered roller bearing product to keep the mills producing efficiently. Since the 1920's, roller bearing technology has changed dramatically and the Rollway brand has been at the forefront of the action. Rollway branded bearings were the first to feature vacuum degassed steel and crowned rollers on all standard products.

Today, Rollway bearings are still some of the highest quality bearings obtainable. Rollway bearing components are made from the finest bearing grade steel available, manufactured in the most efficient manner in a modern facility by some of the highest skilled workers in the industry.

Whether you are looking for a cylindrical mill support bearing or a bearing for use on your rolling mill, Regal is able to offer an interchange product or a complete new design to keep your mill running.

A Wide Variety of Cylindrical Roller Bearings For Rolling Mill Applications

Mill Support Products - most mill support products are available from stock:

Mill Stand Applications - Regal has the design capabilities and ability to produce cylindrical rollers bearings used on mill stands:

Table Roll Bearings

Cylindrical Roll Neck Bearings

Line Shaft Bearings

Screw Down Thrust Bearings

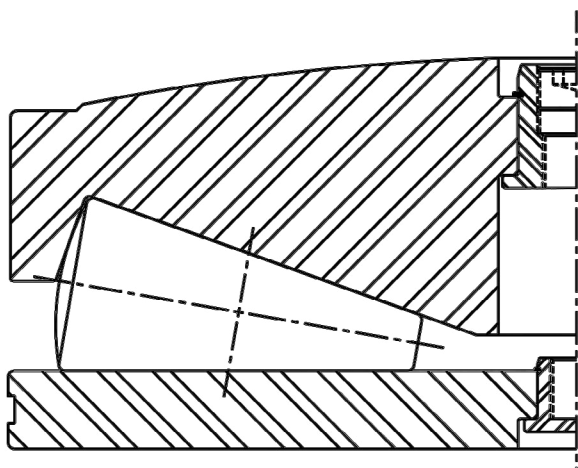

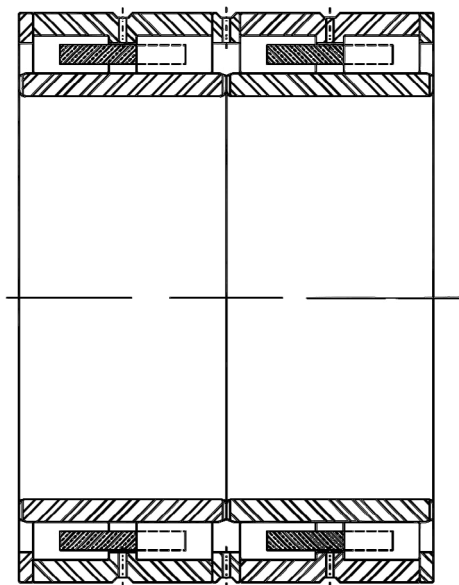

Mill Motor Bearings

MILL STAND BEARINGS

Can be provided as interchange products or Engineered to Order. Contact factory customer service for available sizes or quotes. We will be happy to quote on any of the following product types:

Cylindrical Roll
Neck Designs
available up to
1,067mm Outside
Diameter

Screw Down
Thrust Bearings
Cylindrical Roller
or Tapered Roller
Designs available

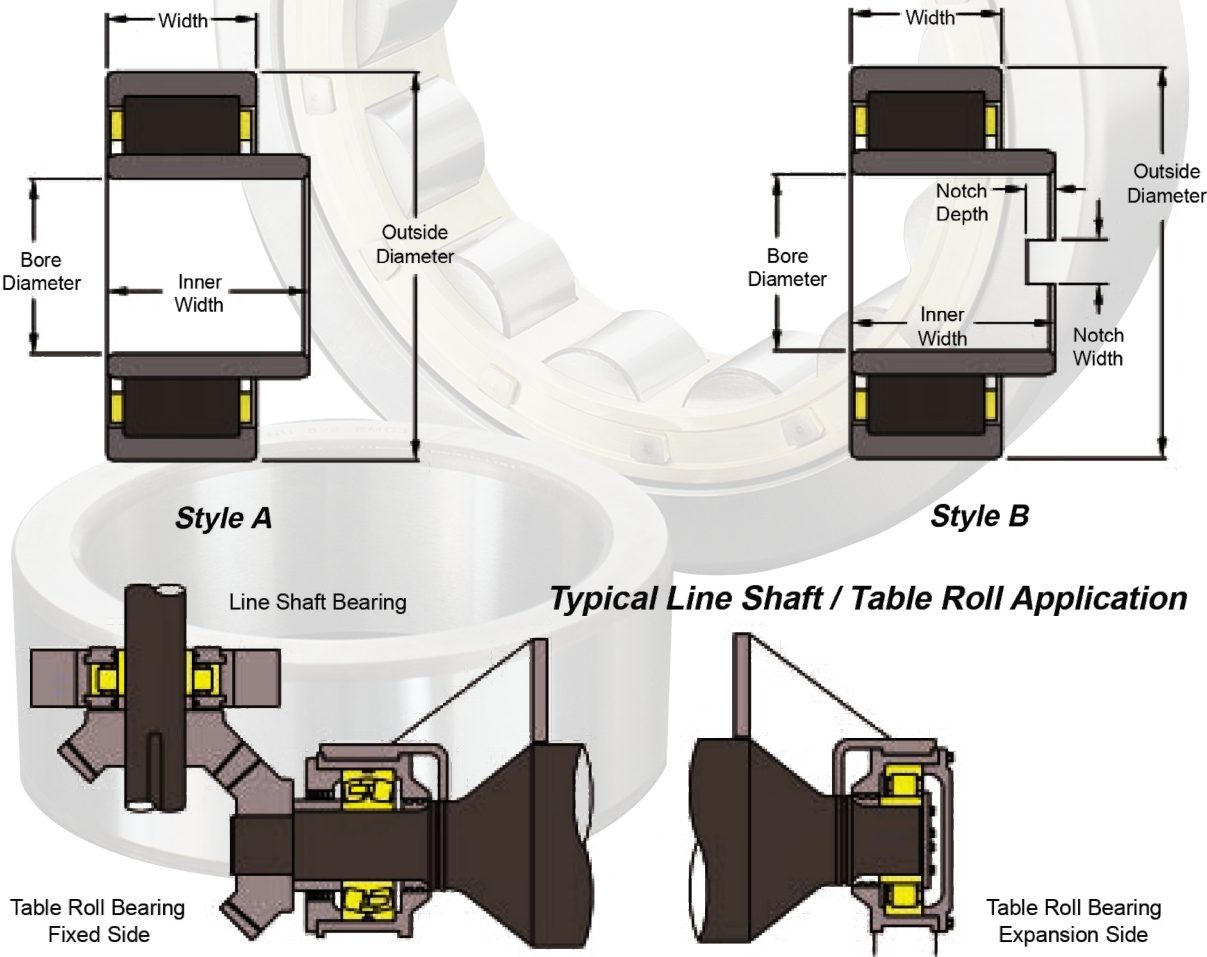

If you would like more information concerning Applications or Interchanging ROLLWAY® roller bearings, **just call: 1-800-626-2120** and ask any of the **customer service representatives**. If they are unable to answer your questions they will be happy to forward your call to one of our application or product engineers for immediate assistance.

CYLINDRICAL ROLLER BEARINGS FOR TABLE ROLL & LINE SHAFT APPLICATIONS

Table Roll Bearings... The ROLLWAY® cylindrical roller bearings used in table roll applications are tough and designed to last in this severe application. Our cylindrical **table roll bearings** (style A) are primarily used on the floating or expansion end of the roll. The design of the inner race provides for expansion that normally occurs as the rolls heat up and deflect under load. Some table roll bearings are supplied with the inner race wider than the outer race to provide for maximum expansion.

Line Shaft Bearings... Our ROLLWAY cylindrical **line shaft bearings** (style B) are used to support the long line shafts that drive the table rolls, the bearings that are positioned between the table roll drive gears. These usually have inch dimension bore diameters with extended and slotted inner rings. The special inner race design allows for maximum shaft expansion and the slot enables the race to be secured to the shaft, reducing the chance of the race slipping when the line shaft reverses direction. Many of our table roll and line shaft bearings are supplied with unmounted internal clearances greater than standard for use in applications requiring heavy shaft fits.

The table on the following page is a listing of the 5200 series cylindrical radial roller bearings that are used in these applications.

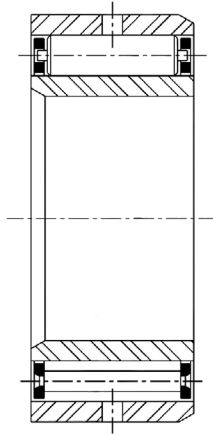

ROLLWAY® 5200 SERIES CYLINDRICAL ROLLER BEARINGS

STEEL CAGE JOURNAL BEARINGS FOR TABLE ROLLS, LINE SHAFTS & GENERAL MILL SERVICE

Steel Cage Journal Bearings are the same basic 200 and 300 series "3 piece bearings" that have been supplied for over 50 years.

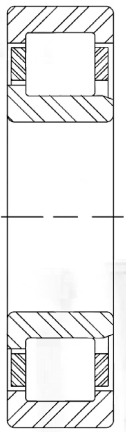

- They are available as complete assemblies or as components.
- All components **factory** hardened to Rc 58 min.
- Roller assemblies have flush ground ends.
- All outer rings are supplied with oil holes.

Rollway® Steel Cage Journal Bearings are designed and built to industry standards. They can be purchased as complete assemblies or as components

CYLINDRICAL ROLLER BEARINGS FOR MILL MOTOR APPLICATIONS

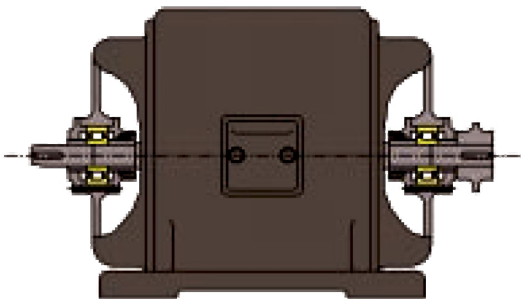

Mill Motor Cylindrical Roller Bearings

- L-1300-U series have segmented steel retainers.
- MUL-200 series have machined brass retainers.
