

CENTFLEX-A COUPLINGS TYPE GB / GZ

`.product-badge { display:inline-block; }` **HIGHLY FLEXIBLE UNIVERSAL JOINT COUPLINGS**

The **CENTFLEX-A Type GB and GZ** series are top-tier, highly flexible mechanical couplings specifically engineered to work in combination with cardan shafts or multi-span arrangements. By implementing a high-elasticity pre-compressed rubber element framework, they absorb severe shock configurations, compensate for large misalignments across three axes, and effectively protect downstream driven equipment from catastrophic torsional resonance frequencies.

KEY PERFORMANCE FEATURES

- **Highly Elastic Design:** Dampens torsional vibrations and shifts critical speed resonance zones away from continuous duty ranges.
- **Multi-Directional Compensation:** Superior capability to tolerate axial, radial, and significant angular misalignments simultaneously.
- **Versatile Layout Typologies:** **Type GB** is optimized for compact space envelopes with robust internal support links, while **Type GZ** is tailored for extensive multi-span intermediate drive shafts.
- **Zero Backlash Transmission:** Ensures dependable precision torque transfer with durable ventilated rubber matrix elements.

REARRANGED TECHNICAL REFERENCE INDICES (SIZES 1 TO 800)

COUPLING SIZE	NOMINAL TORQUE T_{KN} [kNm]	MAXIMUM TORQUE T_{Kmax} [kNm]	MAXIMUM PERMISSIBLE SPEED n_{max} [rpm]
Size 1	0.010	0.030	5000
Size 2	0.020	0.060	4800
Size 4	0.040	0.120	4500
Size 8	0.080	0.240	4200
Size 16	0.160	0.480	4000
Size 30	0.300	0.900	3800
Size 50	0.400	1.200	3600
Size 90	0.800	2.400	3300
Size 140	1.400	4.200	3000
Size 200	2.000	6.000	2700
Size 400	4.000	12.000	2400

COUPLING SIZE	NOMINAL TORQUE T_{KN} [kNm]	MAXIMUM TORQUE T_{Kmax} [kNm]	MAXIMUM PERMISSIBLE SPEED n_{max} [rpm]
Size 600	6.000	18.000	2100
Size 800	8.000	24.000	1900
