

CENTAFLEX-B Flexible Shaft Couplings

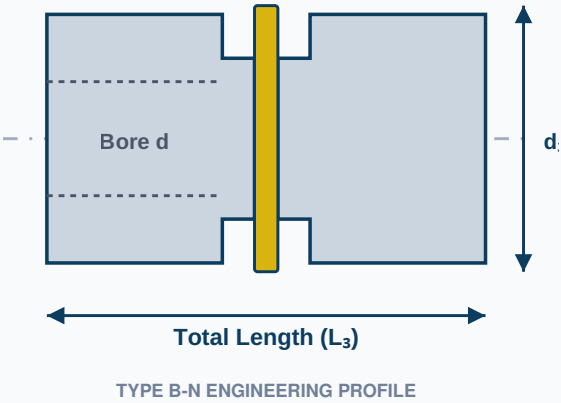

Type B-N and B-H-N Standard Flexible Couplings | Industrial Drive Components

PRODUCT OVERVIEW & ARCHITECTURE

The **CENTAFLEX-B** series features highly resilient, versatile flexible shaft couplings meticulously designed for budget-conscious yet high-reliability industrial applications. Operating as an insert-style elastomeric coupling, it effectively cushions torque shocks, damps torsional oscillations, and accommodates multi-directional misalignments without excessive wear on connected bearings.

KEY DESIGN BENEFITS

- Interlocking Jaw Security:** Built with high-strength aluminum or steel components featuring fail-safe jaw configurations for maximum drive reliability.
- Elastomeric Block Optimization:** Employs specialized, wear-resistant rubber elements available in various shore hardnesses to match specific torsional frequencies.
- Maintenance-Free Lifecycle:** Eliminates standard lubrication requirements entirely while protecting sensitive downstream pump and gearbox shafts.

TECHNICAL DIMENSIONS & SPECIFICATIONS

Size Grösse	d ₁ min [mm]	d ₁ max [mm]	d ₃ [mm]	E [mm]	L [mm]	L ₃ [mm]	N [mm]	S ±1 [mm]	Order Code Bestellbezeichnung
72	9	30	72	14	28	62	50	6	CF-B- (H) -72-N
76	12	30	76	16	30	66	50	6	CF-B- (H) -76-N
98	12	38	98	24	42	90	61	6	CF-B- (H) -98-N
120	15	48	120	28	50	106	71	6	CF-B- (H) -120-N
138	15	55	138	30	55	116	86	6	CF-B- (H) -138-N
165	20	65	165	36	65	138	100	8	CF-B- (H) -165-N
185	30	80	185	45	80	170	115	10	CF-B- (H) -185-N

Dimensions Reference: All data dimensions are provided in millimeters (mm) [cite: 138]. Standard pilot lines denote minimal pre-bored settings [cite: 138]. Finished boring modifications, parallel custom keyway slots, and high-precision dynamic balancing applications should be specified during order booking.
